

Dear Dayton Resident,

As you are probably aware Access Networks in partnership with NetWave Broadband has been working with the City of Dayton to come up with a solution to provide high speed internet to the residents of Dayton. We have reviewed the State of Minnesota's goal of delivering a minimum of 25Mbps of internet to all residents and we are committed to making that a reality. With that said we are currently offering a 40Mbps package for \$79.99 per month with a one-time installation fee of \$199.

NetWave is committed to reaching this goal by deploying various types of technology to meet the needs of each specific area. These technologies include but are not limited to, Fiber Optics, LTE , 900 MHz, 2.4 GHz, 5 GHz, 11 GHz and Micro pops.

The 2 Phases of NetWave Broadband Deployment are:

Phase 1 - delivering fast, reliable and affordable internet.

Phase 2 - we will be providing Phone and TV services including local channels.

To help us better service the Dayton community we encourage you to pre-signup by following the link below. By submitting a request for service, we will have your location documented to make sure coverage is provided. All we ask is your flexibility and understanding as demand is very high. Help us bring you the best internet you didn't think was possible to your area.

Please submit your request for service and pay your installation deposit of \$199 using referral code CATCHTHEWAVE2019 to force your submission through. If for any reason your home can't be service, your deposit will be refunded.

Please sign up by April 15th of 2020 if you are interested in receiving service. This will ensure your home is included in our design.
