

## Meet Your City Council

### City Council Member Stephanie Henderson

1. Please share a brief description of your professional background (in public or private service):

I currently hold a Power Supply Resource Analyst position within the Resource Planning department at an electric cooperative serving 1.7 million Minnesotans. I received my engineering degree from the University of Minnesota and have an associate of science in chemistry.

As a resident for the past nine years, my family has actively contributed to public services, especially in Fire and Rescue. We participate in citywide events, education, training, and outreach efforts.

2. What drew you to serve on City Council?

My decision to run for the Dayton City Council is rooted in my deep involvement and my family's commitment to our community. I believe that making a difference starts in your backyard.

3. Which City matters are you most passionate about? Example: Parks, Infrastructure, etc.

I care about making sure Dayton grows in a way that works for everyone, that keeps up with what people need. I'm passionate about supporting our fire, police, and public works teams and am focused on planning ahead so our city stays strong and ready for the future.

4. Please share one fun fact about yourself.

My husband and I love spending our date days riding our Harley, exploring spontaneous and unexpected destinations together
